

MEDIROL

Vivera Monobloc M302

Introducing new generation
of powered stretcher.

Faster.

Faster loading and unloading with new generation actuator.

More power.

9 Ah rechargeable battery with self-protection system.

Safer.

Electronic release system with Safe-to-Release indicator.

Features

- Battery-powered hydraulic lift system with 320 kg unassisted lift capacity reduces the strain of everyday and bariatric transport
- Manual back-up system for operator confidence
- Battery management system extends battery life
- Integrated charging system allows charging the battery in the vehicle
- Simple operation with only three buttons for all operations
- Easy and safe loading/unloading with safe release indicator
- Pneumatically assisted backrest and leg platform significantly reduces operator effort and increases patient comfort
- Telescoping load frame maximizes maneuverability in tight spaces
- Infinite height adjustment for transferring patients to and from the stretcher
- Settable load height adjusts to fit vehicle with a floor of up 95 cm
- 360° locking swivel wheels allow movements in any direction thanks to the release lever at the foot end
- Integrated bumper system
- Rubber wheels for better shock absorption
- Dual wheel locks prevent stretcher rolling during patient transfer and medical procedures
- Sealed anatomic mattress optimizes patient comfort and hygiene

Specifications

Length (Minimum-Maximum)	1630/1600 mm - 2000 mm
Width (Overall)	600 mm
Width (Patient Surface)	460 mm
Height (Minimum-Maximum)	380 mm - 1330 mm
Loading Height	Max 950 mm
Backrest Adjustment	0-90°
Leg Platform Adjustment	0-30°
Footrest Adjustment	50°
Wheels	150 x 50 mm 200 x 50 mm (Optional)
Load Capacity	320 kg
Stretcher Weight	75 kg
Stretcher Operating Range	-34°C to 60°C
Battery Operating Range	-40°C to 60°C
Battery Output	36 VDC, 9 Ah
Max Operating Duty Cycle	<18 sec ON; >102 sec OFF

Specifications are rounded. MEDIROL reserves the right to change specifications without notice.

- Load capacity is the amount of weight the stretcher is designed to hold, including patient and accessories attached.
- Height is the distance from the ground to the patient surface.
- Loading height is the distance from the ground to the bottom of the loading wheels.
- Weight includes the battery but is without mattress, patient restraints, or optional features.

Accessories & Options

Head Extension

IV Pole

Oxygen Cylinder Holder, Head-End

Medical Rail

Push/Pull Bar, Foot-End
