GROUNDWORK SERIES

Functional, individual and light:

THE BRAND NEW GROUNDWORK SERIES

This emergency backpack is an expert in its field. The focus of this series is primarily on functionality and individuality with low weight. The main compartment offers plenty of space and allows an individual arrangement in the interior. Thanks to its modern design, the bag is not just light, but also very robust.

Wrapped in a **new design** and made in Europe from high quality materials.

Even easier to clean and disinfect.

In 2 different sizes available:

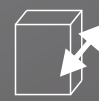

Groundwork M [761000]
Groundwork L [762000]

Transparent front case for individual labeling and personalization

High-quality reflectors for better visibility

Completely plain and smooth surface over the whole interior area, without Velcro fasteners and hard to reach gaps for easy cleaning

Abrasion protection on the bottom of the backpack to improve durability.

To make cleaning and disinfection as easy as possible, the entire surface of the backpack is made of plain material. The anatomically shaped shoulder straps are adjustable in size and can be stowed in the back if necessary. There is an additional compartment on the front where you can store a stiffneck, for example.

The Groundwork series is already available with the new **MFS 2.0** inner pockets. The module bags can be attached with a magnet and can be individually arranged, exchanged, supplemented and placed freely as usual.
